DMG Partners with HVAC Innovator Geoclima

California, Hawaii & Western Nevada to offer Ultra-Efficient HVAC Solutions

Orange, CA, May 31, 2019 - DMG is excited announce an exclusive partnership with Geoclima, an Italian based, global designer and manufacturer of high efficiency and custom chillers for sustainable HVAC solutions. DMG is the first manufacturer's representative that Geoclima has chosen to partner with since they entered the North American Market two years ago.

"We're excited to be an exclusive partner with Geoclima. Their product line is addressing the concerns that we hear from our customers each day. Great forward-looking products coupled with professional support matches DMG's mission to deliver innovation to the marketplace." Steve Weston, President of DMG Corporation.

The Geoclima product line includes industry leading efficiency for air cooled chillers, unique condenser designs, advanced sound control technology, options for natural and alternative refrigerants, as well as heat pump and heat recovery systems. Since the introduction to the North American marketplace at the AHR Expo in Las Vegas in January 2017, they have delivered systems to a number of reference sites, opened Geoclima USA sales office, completed AHRI certification, and released U.S. versions of their selection software. The focus now shifts to growing market awareness and sales through strategic partnerships.

"Our customers desire environmental and climate-friendly solutions. Geoclima's commitment to quality, efficiency, sustainability, and innovation is a great fit for our market. With Geoclima added to our product lineup, we have solutions available for designers and builders moving toward delivering a net-zero future; for clients who want to offer greener options to their customers." said Joe Pipitone, President, DMG North.

A series of customer events are being planned to introduce their products to engineers, contractors and owners throughout the DMG territory. Learn more at: www.dmghvac.com and www.dmgn.com

About DMG

DMG is a manufacturers' representative for custom engineered, high quality commercial Heating, Ventilating and Air Conditioning (HVAC) equipment. Since opening in 1967 in Southern California, DMG has worked closely with consulting engineers, contractors, developers and facility engineers/owners, in the design, selection and delivery of top quality equipment. Our team of engineers, project managers, service technicians, and application specialists are focused on delivering better value for the life of the building. DMG and its affiliated companies now have offices in California, Hawaii, and Nevada. For more information about our extensive product & service offering, project case studies, or upcoming events, visit: www.dmghvac.com or www.dmgn.com

About Geoclima

Geoclima produces specialized chillers for applications in air conditioning systems, with particular attention to quality, customization and environmental sustainability. Geoclima has an extensive portfolio of air and water cooled chillers utilizing different compressor technology, multiple refrigerant options, including many innovative design options. Industry has recognized their leadership in system designs that make use of 4th generation refrigerants, with zero ozone-depleting compounds and extremely low global warming potential.
